SEP 24 2007**Listing and Amendments to the Claims**

1. (Currently amended) A video recorder comprising:

[[-]] a source of a digital stream representing a video signal in one of a plurality of video standards;

[[-]] means for recording the digital stream on a medium as a recording among a plurality of recordings;

[[-]] means for recording an indicator of the video standard for the recording;
and

[[-]] means for detecting the video standard of the video signal thereby generating the indicator;

wherein the recording means automatically starts a further recording when the detecting means detects a change in the video standard.

Cancel claim 2.

3. (Currently amended) A process for recording a digital stream on a medium as a recording among a plurality of recordings, the digital stream representing a video signal in one of a plurality of video standards, with the steps of:

[[-]] detecting the video standard of the video signal;

[[-]] recording an indicator of the video standard for the recording;

detecting a change in the video standard of the video signal; and

recording the digital stream as a further recording.

Cancel claim 4.

5. (Currently amended) A process for recording a digital stream on a medium, the digital stream representing a video signal in one of a plurality of video standards, with the steps of:

[[-]] recording the digital stream as a first recording;

Serial No. 10/770,716
